Curriculum Intent, Implementation & Impact

Intent

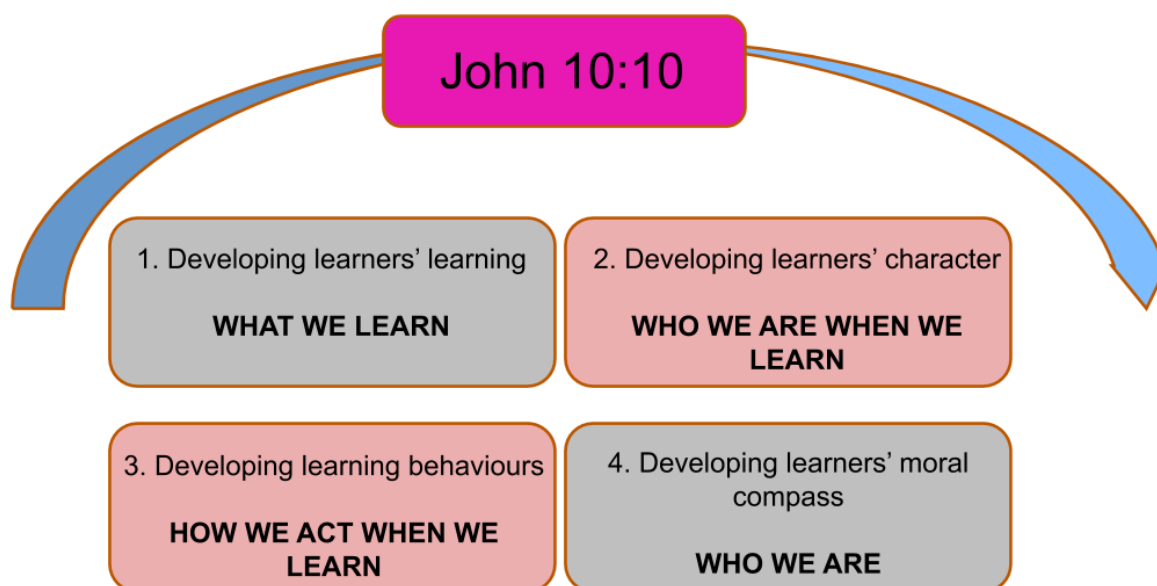

As a Trust, we understand the importance of learning more, knowing more and remembering more, securing knowledge, practise and showing our dedication to become confident and flexible thinkers. We deliver all subjects in the National Curriculum but in a way which reflects the pupils, community and vision in each of our schools under the Trust vision:

Our curriculum is the beating heart of our school and is rooted in John 10:10. ***“I came that they might have life and live it to the full”***

Our curriculum has been deliberately designed to be ambitious and meet the needs of our children as well as the National Curriculum expectations. Subjects have been planned to expand knowledge nationally and across the world.

Our curriculum design is rooted in developing our pupils as learners under **4 key principles**:

- Developing learners' learning
- Developing learners' character
- Developing learning behaviour
- Developing learners' moral compass

Developing learners' learning

WHAT WE LEARN

Our children will experience a knowledge-rich curriculum, underpinned by oracy, language and reading.

Developing learners' character

WHO WE ARE WHEN WE LEARN

Our children's uniqueness will be nurtured so that they develop self-discipline and integrity to make good choices.

Developing learning behaviours

HOW WE ACT WHEN WE LEARN

Our children will develop their learning behaviours and attributes so that they can embrace all opportunities and think critically.

Developing learners' moral compass

WHO WE ARE

Our children will develop a deep sense of self and others to contribute positively within the diverse community and world in which they live.

Every child in our Trust is recognised as individual and unique as is every community and context. The ability to learn is underpinned in curriculum subject areas by the teaching of basic skills, knowledge, concepts and vocabulary. There are clear, identified end points in each phase of learning which build upon what has been taught before and gives pupils the required knowledge and skills for their next stage of learning. Our curriculum is not solely focused on academic subjects and achievement. We provide pupils with rich learning experiences, educational visits, residentials, extra-curricular activities and enrichment opportunities. We want children to feel fulfilled at school and talk about their primary school years as being full of great memories .

Our vision is to provide an overall education which prepares each pupil with the tools and strategies needed to cope with the challenges currently posed in modern day Britain e.g social media, health and relationships and finance. We also aim to ensure that our pupils know how to make a positive contribution to their community and wider society.

Lamerton C of E Academy Vision

Our Christian vision shapes the strategic and operational direction of the school; leading to innovative and imaginative practice that will help pupils transform their lives.

Planting seeds of hope in our community. Together we dream, believe and achieve.

Our pupils enjoy learning about the stories that Jesus told us. We have chosen the parable of ‘The Sower’ to inspire and underpin our vision which runs through the heart of our school. We work to build a caring, inclusive community, in which we can all **grow and flourish** under God’s guidance. The sower sowed his seeds in different types of ground. The path meant that the seed could be easily snatched by a bird. The rocky ground meant the roots could not grow deep. The thorny ground smothered and choked the plant but the seed sown in good ground, grew well and provided a plentiful crop. No matter the changes in temperature or weather, the good soil gives the seed exactly what it needs to grow, be healthy and have deep roots.

We strive to **provide the good soil for all our children to flourish**. We care for all our children and support them to care, learn and **grow**. We believe our purpose is to nurture and enable every one in our community to flourish as this will enable children to be the person they are fully capable of being. We articulate this as ‘**Dream, Believe, Achieve**’. We desire to aim high, with courage to dream.

Dream

The journey towards excellence begins with the desire to aim high, the creativity to explore new horizons and the courage to dream. We dream of a community built on mutual respect, generosity, gratitude, care and love. Jesus offers possibilities and hope. He issues a challenge to acknowledge our own personal responsibility for our own growth.

Believe

We celebrate self-belief as well as belief in one another. We value each other for who we are as well as for what we achieve.

The sower seeks to nurture and help us grow in every way, our growth mindset seeks to empower. We are inspired by Jesus’ message and offer opportunities for everyone to develop their innate spirituality, recognising the diversity within our community.

Achieve

Achievement is the goal of all that we do;

Academic achievement, sporting achievement, creative achievement, personal achievement.

Achieving independently, achieving collaboratively, achieving as a community.

Bearing fruit and flourishing is our aim for all.

Gulworthy Academy Vision

A caring community which provides inspiration, challenge and enjoyment for all.

1. Belonging

We will:

- a. value and respect all members of our local and global communities.
- b. feel safe in a caring, nurturing, inclusive environment.
- c. promote and sustain good health and happiness.
- d. be inspired and supported within a stimulating Christian ethos.

2. Curiosity and Creativity

We have:

- a. inspirational and stimulating learning environments.
- b. opportunities to explore and enjoy learning.
- c. motivated and confident individuals who are willing to take risks, persevere and reflect on achievements.

3. Aiming High

We can:

- a. challenge, question and investigate.
- b. take responsibility for our own learning.
- c. realise success and reach our full potential.

Implementation

How is our curriculum taught at a subject and classroom level?

Subject Leadership:

The role of the subject leader is pivotal in the successful implementation of our curriculum. We aim for all subject leaders to have the knowledge, expertise and practical skill to be able to lead their areas effectively. Each curriculum subject has a dedicated subject leader with clear roles and responsibilities. They are responsible for the curriculum design, delivery and impact in their own curriculum area. Subject leaders and leaders at all levels, including Governors regularly review and quality assure the subject areas to ensure that it is being implemented well and coverage and breadth and balance is adequate.

CPD:

In order for us to be able to deliver the best and most up to date curriculum we provide staff with high quality CPD in their subject specific pedagogy. This may include attending nationwide courses on the curriculum, assessment of research but also as a result of sharing through best practice networks across the Trust. Alongside this the Trust is also a member of the relevant national associations for national curriculum subjects. Through this we receive updates, courses and research findings into effective provision for primary pupils. We aim to give staff the expert knowledge required to deliver the subjects that they teach. Ongoing professional development through subject leader networks and incremental coaching is available for all staff to ensure that our challenging curriculum requirements can be met.

In our smaller schools, subject leaders often have more than one subject area to lead and subject leadership roles can change frequently or teachers may lead a subject across a Hub. Because of this leaders enable curriculum expertise to develop across the school and teaching staff. Newly qualified teachers have opportunities to shadow a subject leader during their first few years of teaching as part of their CPD to ensure that when they take on a curriculum leader role in school they fully understand the expectations and roles and responsibilities.

Planning:

The curriculum overview is carefully mapped out to ensure that pupils acquire knowledge, vocabulary and skills in a well-thought out and progressive manner in every curriculum subject ensuring sufficient coverage across each subject over time. New learning is based upon what has been taught before and prepares pupils for what they will learn next. There are clear end points which pupils work towards on their learning journey. We know that if our pupils are learning our curriculum, they are making progress and are being prepared for the next stage of their educational journey.

Reading:

The teaching and acquisition of reading skills is prioritised across the Trust to allow pupils to access the full curriculum. We use Systematic Synthetic Phonics programmes (Little Wandle) for the teaching of early reading skills. We then use a Trust Whole Class Reading Programme (DERIC) to teach reading and vocabulary development once the pupils have acquired enough reading skills to be independently accessing texts.

Where a pupil has been identified as not on track to achieve this target, intervention is put in place through bespoke teaching and 1:1 reading support to enable them to catch up and achieve in line with their peers. Pupils are able to access a range of reading resources and texts in the central school library.

Assessment:

Assessment is designed thoughtfully to shape future learning and usually takes place within the lesson. It is not excessive or onerous as it is part of the day to day working practices of the classroom and aligns with our Feedback Policy. Teachers ensure that pupils embed key concepts in their long term memory. Key skills and objectives for curriculum areas are revisited throughout the year and applied in different contexts. Pupils revisit prior learning in their work books as an introduction to their new learning and this provides a context upon which pupils can integrate their 'new knowledge' into a wider context.

Curriculum Impact

Monitoring and Evaluation:

The Senior Leadership team and subject leaders in each academy are responsible for the monitoring and evaluation of the curriculum and this will take the form of learning walks, book looks and pupil conferencing. The information from the monitoring and evaluation then forms the basis of the impact assessment for that curriculum area.

Judgements on the impact of the curriculum on pupils is based upon a triangulation of different monitoring and evaluation activities within schools. Work and book scrutiny, pupil voice discussions, outcomes of assessments and quality of teaching and learning are all used as tools to help senior leaders assess the impact of the curriculum. The quality of the curriculum also feeds into our Academy Health Checks.

Outcomes for Pupils:

Our curriculum consistently leads to good outcomes and results for **all** of our pupils. We aim to be consistently above national averages for outcomes at the end of EYFS, KS1 and KS2 with gaps closed or closing for those pupils disadvantaged. We regularly achieve highly in the phonics screening check for our Year 1 pupils and usually all of our pupils have passed the phonics screening test by the time they leave Year 2 unless there is a special and specific learning need.

Pupils with additional learning needs make good progress across the curriculum in line with their own progress measures. Assessment of these pupils is in much smaller and achievable steps. We are proud of the life-skills curriculum that we provide for our pupils including our SEND pupils. Essential skills such as first aid, money awareness, internet safety, healthy eating and basic life skills such as tying shoe laces, using knives and forks correctly, telling the time are all part of what we consider to be necessary skills for our pupils to succeed in life and are key parts of our teaching in school.

Our Curriculum

Each of our subjects has a curriculum intent which are outlined below:

Curriculum Maps will map out the subject content covered in each year group over the academic year building on the knowledge and skills taught and links between subjects.

English	As communicators, our children will experience an English curriculum which is underpinned by oracy and language. Our children will build confidence as oral and written communicators who are fluent readers and are prepared for the next step in their education. The English curriculum will be language-rich, foster a love of our literary heritage, encourage children to take pleasure in books and acquire knowledge across the broader curriculum. As writers, children will learn to craft texts for a variety of audiences and purposes and develop their authorial voice with an increasing knowledge of vocabulary and grammar which will equip them for the future.
Maths	As mathematicians, our children will develop a deep conceptual understanding through exploration, reasoning and problem solving of all areas. We expect our children to explain and articulate their understanding and become fluent in number so they can use known number facts to make efficient choices with calculations. They will make connections and discover patterns to take creative approaches when faced with challenges and show appreciation of the beauty and power of Mathematics. We aim to develop resilient learners and our children take time to deepen their understanding of mathematical structures through the use of resources and representations.
Science	As scientists, our children will experience a sense of awe and wonder of their environment and the natural and physical phenomena of the world they live in. They will understand how scientific advancements and the work of scientists continue to shape human achievement. They will learn scientific enquiry skills that will enable them to predict, investigate and evaluate evidence and draw conclusions. Pupils should be encouraged to recognise the power of rational explanation that enables them to ask and answer questions.
Geography	As geographers, our pupils will hone their knowledge of place and location as they develop a curiosity and fascination about the world and its people. Our children will understand the world's most significant human and physical features while understanding how people interact with and impact the natural world. They will strike links between the growth of settlements through industrial progress and growth of society and settlements, enabling them to become stewards of the future and environmentally-minded global citizens. They will discover how landscapes and environments, both rural and urban, have changed over time and the impact of these changes.
History	As historians, our children will be encouraged to question their understanding of the past, inspiring a curiosity to learn more about the society in which we live and those of the wider world. Children will critically examine sources and evidence, establishing clear and coherent narratives through civilisations, empires and communities across both Britain and globally. With this knowledge, they will be informed to critically evaluate and explore change, making connections, identifying contrasts and trends over time and recognising how the past impacts upon the present and our futures.
RE	As global citizens, our children will develop a positive sense of self and others through a coherent, knowledge-rich understanding of religion and belief. They will gain an understanding of what people believe and the difference that this makes to the way in which they live. They will express their own ideas in response to material they engage with and be curious to ask increasingly challenging questions. Through these meaningful discussions and reflections, children will develop respect for those of different faiths and beliefs and develop a moral and cultural awareness of what it means to be human in today's diverse world.

PE	<p>As well-rounded, active citizens, our children will feel a sense of belonging by immersing themselves in a wide range of physical activities. The PE curriculum will enable children to use movement confidently, developing respect for themselves and each other and a positive sporting attitude. A physically demanding and challenging curriculum inspires all to succeed and excel, developing both physical and mental health and wellbeing. Opportunities for positive competition in sport and other activities build character and self-discipline whilst encouraging them to continue to have an active lifestyle beyond their school life.</p>
Art	<p>As artists, our children will be challenged and inspired to develop a sense of individual expression and have the confidence to imagine, invent, design and create their own works of art through a wide range of media and techniques. Experimentation, fuelled by curiosity, is embraced and valued as children develop techniques in using colour, pattern, texture, line, shape, form and space.</p> <p>Alongside this, children will deepen their knowledge of great artists, as well as local artists, who have shaped and contribute towards our artistic culture and heritage on a local, national and global scale.</p>
DT	<p>As designers and constructors, our children will be empowered to be inquisitive, curious learners. Within the design technology curriculum they will become critical thinkers, partaking in analysis of the impact of Design Technology on everyday life and the wider world, where they will evaluate past and present innovative enterprise. Our children will research, plan, design, make and critique products that solve real and relevant problems within a variety of contexts considering their own needs and others' views, wants and values.</p>
MFL	<p>As linguists, our children will deepen their understanding and respect for the world and cultural differences in other countries. We are committed to developing a love of languages to encourage students to become curious and interested in the world. Using authentic texts, pupils will embed the skills of listening, speaking, reading and writing in another language. This learning will be applied in a variety of contexts, enabling them to build an understanding of the language structures, patterns and sounds, stimulating their curiosity about language. Children's knowledge of how language works will be developed to lay foundations for the future.</p>
Computing	<p>As users and programmers of communication and information technology, our children will develop their computational thinking, logical reasoning and digital literacy. They will use a variety of computer software to express themselves, to develop their ideas, to solve challenges, to design coding programs and systems and to create content. Our emphasis on online safety for all pupils will equip our children with the knowledge and skills to keep themselves and others safe online and to use information technology in an informed and responsible way. Through our curriculum, our children will be enabled to thrive and participate actively in a continually evolving digital world.</p>
Music	<p>As musicians, our children will be inspired to develop a love of music through listening, performing, composing, playing, evaluating and learning about music across a range of historical periods, genres, styles, traditions and cultures. Our children will foster their musical talents with opportunities to learn a musical instrument, develop their understanding of musical notation, improve their singing voices and create music on their own and with others. This will enable our children to grow in self-confidence, express their creativity as well as experiencing a sense of achievement.</p>
RSE	<p>As healthy, confident and resilient children of Modern Britain, our pupils will be supported to understand themselves and others; families, communities and the wider world. In doing this, children will be supported to develop a deep sense of self worth, self respect, self awareness as well as self discipline. We want our children to be equipped to both face and overcome challenges and develop the character that we know is fundamental to being successful,</p>

happy and productive members of society; that they can achieve goals and ambitions, that they have the skills and the resilience to recover from setbacks that may occur in life.
